

VirtualBox

Pieter P

This page explains how to install VirtualBox on Ubuntu.

[Source](#)

Install the Oracle public key

```
$ wget -q https://www.virtualbox.org/download/oracle_vbox_2016.asc -O- | sudo apt-key add -  
$ wget -q https://www.virtualbox.org/download/oracle_vbox.asc -O- | sudo apt-key add -
```

Add the repository

```
$ . /etc/os-release  
$ sudo add-apt-repository "deb http://download.virtualbox.org/virtualbox/debian $UBUNTU_CODENAME contrib"  
$ sudo apt update
```

Install VirtualBox

```
$ sudo apt install virtualbox-6.0
```

Tested on

- Ubuntu 16.04
